## 1989 NONPOINT SOURCE WATER QUALITY ASSESSMENT

### LONG FORM

\*\*\* WATERBODY \*\*\*

Page 1 of 4

Name of Waterbody: Clearwater Cr.

Location or Lat/Long: 64° 06' N , 145° 34' W

#### Waterbody Type:

- ☒ River/Stream
- ☐ Lake
- ☐ Fresh Wetland
- ☐ Tidal Wetland
- ☐ Estuary
- ☐ Coastal Shoreline
- ☐ Groundwater

#### Waterbody Size:

- 23 Miles
- ☐ Acres/Hectares
- ☐ Acres/Hectares
- ☐ Acres/Hectares
- ☐ Square Miles
- ☐ Square Miles

#### ADEC USE ONLY

304i: N L M S

WQL: 0 - N

1 - PS

2 - NPS

3 - WQS

4 - Con/Enf

ID#:

#### Segment of Waterbody Addressed:

From:

To:

Other Description: Trib of Tanana R, near Delta Junction

Size of Segment:

USGS Hydrologic Unit #: AK 190 40503-001

\*\*\* ASSESSMENT \*\*\*

#### Describe Source of Pollution and Documentation Provided:

Erosion and runoff from Agricultural land and upland forests

#### Type of Documentation (Attached If Possible):

- ☒ Water quality data
- ☐ Documented oil spill
- ☐ Enforcement action
- ☐ Photos with documentation
- ☐ Photos without documentation
- ☒ Written report
- ☒ Field notes
- ☐ Overflight
- ☒ Observation
- ☐ Other

#### Assessment type:

- ☒ Monitored
- ☐ Evaluated

#### Violation of Water Quality Standards:

- ☐ Past Violation Documented
- ☐ Current Violation Documented
- ☒ Current Violation Suspected
- ☐ Future Violation Projected

#### Waterbody Status:

- ☐ Impaired - Past
- ☐ Impaired - Current
- ☒ Suspected
- ☐ Unimpaired

Comments: Other sources include: Salcha - Big Delta SWCD, ADEC's 6 Annual Surveys, USGS Water Data Reports, USFWS Fish Tissue Analysis.

\*\*\* USE STATUS \*\*\*

Page 2 of 4

**Meets Clean Water Act Goals:**

- |  |   |
|--|---|
| <input checked="" type="checkbox"/> Fishable     | <input checked="" type="checkbox"/> Swimmable     |
| <input type="checkbox"/> Not Fishable            | <input type="checkbox"/> Not Swimmable            |
| <input type="checkbox"/> Fishable Not Attainable | <input type="checkbox"/> Swimmable Not Attainable |

**Impaired Uses:**

FRESHWATER

- ☐ Drinking
- ☐ Agriculture
- ☐ Aquaculture
- ☐ Industry
- ☐ Recreation, Contact
- ☐ Recreation, Secondary
- ☒ Fish, Shellfish, Wildlife

MARINE

- ☐ Aquaculture
- ☐ Seafood Processing
- ☐ Industry
- ☐ Recreation, Contact
- ☐ Recreation, Secondary
- ☐ Fish, Shellfish, Wildlife
- ☐ Harvest of Fish, Shellfish

**Support of Designated Uses:**

- ☐ One or More Uses Not Supported (Impaired)
- ☐ One or More Uses Partially Supported (Partially Impaired)
- ☒ One or More Uses Suspected to Be Affected (Suspected)
- ☐ One or More Uses Projected to Become Affected (Projected)
- ☐ All Uses Fully Supported, sources present (Unimpaired)
- ☐ All Uses Fully Supported, no sources present (Unimpaired)

**Trophic Status:**

- ☐ Oligatrophic
- ☐ Mesatrophic
- ☐ Eutrophic
- ☐ Hypereutrophic
- ☐ Dystrophic
- ☒ Unknown

**Trophic Trend**

- ☐ Improving
- ☐ Stable
- ☐ Deteriorating

\*\*\* TOXICS \*\*\*

Monitored for Toxics: ☒ Yes ☒ No

**Type of Toxics Monitoring:**

- |  |   |
|--|---|
| <input checked="" type="checkbox"/> 1 Organics in water column   | <input checked="" type="checkbox"/> 10 Metals in sediments              |
| <input checked="" type="checkbox"/> 2 Organics in sediments      | <input checked="" type="checkbox"/> 11 Metals in fish tissue            |

DESCRIBE POLLUTANTS AND POLLUTANT SOURCES. THE BASIS FOR THE DETERMINATION THAT A WATERBODY IS IMPAIRED MUST BE EXPLAINED IN THIS SECTION. DESCRIBE THE NATURE OF THE VIOLATION OF WATER QUALITY STANDARDS, INCLUDING DATA OR OTHER DOCUMENTATION IN RELATION TO STANDARDS. ALSO DESCRIBE WHETHER THE VIOLATION IS CONSIDERED PAST OR CURRENT, AND OTHER RELEVANT INFORMATION.

Clearwater Cr. is an important recreational stream in the Delta area. Water has been of pristine quality. Delta Barley Project is adjacent, exposes cleared land. Regular flooding of creeks in area threatens siltation. Established bog around headwaters greenbelt.

Roads & trails threaten erosion. Fire in 1997 threatens major erosion if heavy rain/flooding.

Delta SWCD developed "Clearwater Flood Control & Windbreak Plan" in 1964, revised in 1986.

## Comments:

Water sampling done on Clearwater Cr.  
after flooding in late June - very turbid water  
from runoff after flooding.  
Scott Gray of Geological Survey has data - need  
to check with him to see if results are in.

[Including extent of impairment of uses; significance of impacts on public health and the environment; water quality trend; efforts to control pollutants; current priority for developing pollutant controls; and adequacy of data]

Clearwater Creek is presently very good water quality with an important grayling and whitefish recreational fishery.

Storm events have caused runoff gullyng below the Granite Mountains in a burned area and through the Delta Agricultural Project.

A 25p report completed in 1987 described ways to mitigate the potential for surface water runoff containing sediment, fertilizer and pesticide residue. The Selkirk-Big Delta Soil and Water Conservation District Board is currently collecting data on the effects of the 1986 fire. This information will become a Supplementary Report to the Granite Mountains - Clearwater Creek Water Quality Planning Report.

re: Water Quality Act, Section 319-Request for nomination of  
Threatened Water Bodies

Dear Mr. Sturdevant:

This District nominates the Clearwater Creek (also known as the Clearwater River and the Delta Clearwater) as a threatened water body. This stream feeds into the Tanana River from the east-southeast just northeast of Delta Junction.

This stream consists of clear, continuously running water, fed by underground springs along both banks for its entire length of approximately 20 miles. It is a major recreational stream for boating, rafting, canoeing and fishing, supports a significant population of white fish and grayling during the summer months, and is perhaps the major silver salmon spawning stream in the Tannana drainage.

Siltation and water quality degradation are a threat due to runoff from the north slopes of the Granite Mountain section of the Alaska Range, and portions of the Delta Wildlands, Delta Bison Range, Fort Greely Military Reservation, and the Delta Agricultural Project. One study has been completed and a supplementary study is currently underway to assess the situation, recommend appropriate action, and implement those recommendations.

This stream belongs on any list of threatened water bodies.

Sincerely,

Charles G. Forck  
Secretary-Treasurer

CF/ch

re: U.S. Army Land Use Application - Delta Bison Range

Dear Mr. Kerin:

This District is opposed to U.S. Army use of any portion of the Delta Bison Range for training activities or access routes.

Past experience demonstrates that during afore mentioned activities the U.S. Army has made continuous good faith effort to minimize detrimental impacts on the area. However, the very nature of the activity and the inevitable lapses from total control over personnel performance result in negative impacts.

These negative impacts are particularly crucial in the area applied for. Portions of the stretch of ground which includes the north slopes of the Granite Mountain section of the Alaska Range, the Delta Wildlands, Fort Greely Military Reservations, the Delta Bison Range, and the Delta Ag Project, are subject to severe erosion due to summer rainfall runoff. Existing trails and destruction of vegetation have combined with natural forces to cause major erosion on the surface and to threaten the integrity of the Clearwater Creek, toward which all of this area drains. Siltation and water quality degradation will have tremendous negative impact on the recreational boating, sport fishing (white fish and grayling), and silver salmon spawning.

This District has completed one study of this area, and due to extensive wild fire in late May 1987 is presently conducting a supplementary study to assess the situation and to recommend specific preventative measures to preclude a widening problem.

Page 2  
Jack Kerin  
May 12, 1988

Continued use by the U.S. Army will create additional hazards as access trails and destruction of vegetation provide additional sites and routes the cutting action of running water.

In its present condition the area in question is subject to the destructive effects of natural forces. To knowingly exacerbate the conditions by permitting additional destructive effects is not wise use of this resource and it will create additional demand for preventive action in the years to come. The requested use permit is not in the best interest of the land, or of the people who will have to deal with the after effects.

Sincerely,

Charles G. Forck  
Secretary-Treasurer

RE: GROUNDWATER WORKSHOPS

RECEIVED

OCT 24 1988

DEPARTMENT OF  
ENVIRONMENTAL CONSERVATION

DEAR SIR:

THANK YOU FOR INVITING ME TO THE WORKSHOP.  
I CAN'T MAKE IT BUT WOULD HAVE LIKED TO  
STATE THE FOLLOWING: THE CLEARWATER  
RIVER HAS BECOME A RECEIVER OF CHEMICALS  
USED ON THE DELTA BARLEY PROJECT. ALTHOUGH  
NOT A GROUND WATER SOURCE PER SE, THE  
CLEARWATER RIVER IS THE RESULTS OF MANY  
UNDERGROUND SPRINGS. AS FAR AS I KNOW,  
NOT ONE GOVERNMENT AGENCY IS MONITORING  
THE RIVER — AS FAR AS CONTAMINATION BY  
PESTICIDES AND HERBICIDES IS CONCERNED.  
IN THE OVERALL VIEW OF ALASKAN WATER  
QUALITY, I HOPE THAT THE CLEARWATER IS  
INCLUDED.

—th. l. A.H. Saarloos
